Tel No:

B. Brief description of proposed works:

C. Category under which chimney height approval is sought: (tick box)

(a) Construction of new chimney(s)

(b) Increase of combustion space of existing furnace (Note 2)

(c) Replacement of furnace by one having larger combustion space

(Signed)..... Date (Note 3).....
[on behalf of the applicant]

Notes:

1. The third edition of the 1956 Clean Air Act Memorandum on chimney heights (issued with joint Circular DoE 25/81 Welsh Office 12/81) provides technical guidance. This is available from HMSO.
2. Including addition of a new furnace to an existing installation.
3. Section 15(4) of the Clean Air Act 1968 provides as follows:-
"If a local authority to whom an application is duly made for approval fail to determine the application and to give a written notification of their decision to the applicant within four weeks of receiving the application or such longer period as may be agreed in writing between the applicant and the authority, the approval applied for shall be treated as having been granted without qualification."
4. The information should relate to the total furnace or boiler plant which the proposed chimney will serve after all the works have been completed.
5. If oil specify type and viscosity. If solid fuel give Coal Board specification or colliery source if known.

PARTICULARS TO ACCOMPANY APPLICATION FOR APPROVAL

A. Description and use of furnace(s):

1. Intended use of furnace(s) (eg boiler plant, metal or reheating, calcining, drying etc) (Note 4)
2. Type and description of furnace(s) (Note 4)
3. (a) Particulars of furnace(s) to be installed

(b) Particulars of changes intended to existing furnace(s)

(c) Particulars of furnace(s) to be removed

B. Rating and fuel consumption (Note 4)

4. (a) Maximum continuous rating of boiler(s) (MW (megawatts) or pounds steam per hour from and at 100°C or Btu's per hour)

(b) Maximum rate of fuel consumption in kilograms per hour or cubic metres per hour (separately for different fuels)
5. (a) Type(s) of fuel to be used (Note 5)

(b) Gross calorific value in MJ/Kg or MJ/m³ (separately for different fuels)
6. Sulphur content of fuel %

C. Particulars of emissions

7. Quantity and quality of emission (if any) from the material being heated eg fume sulphur trioxide, hydrogen sulphide
8. (a) Volume of chimney gases at working temperature (cubic metres per second calculated from paragraph 4(b) above)
- (b) Working temperature of chimney gases in degrees C. (State point of measurement)
- (c) Efflux velocity of chimney gases at working temperature and at maximum loading of plant (metres per sec)

D. Particulars of buildings

9. Height of building to which the chimney(s) is/are attached
10. Length of building to which the chimney(s) is/are attached
11. Width of building to which the chimney(s) is/are attached
12. Height(s) of adjacent building(s)
13. Distance of adjacent buildings from proposed chimney(s)

E. Particulars of chimney for which approval required

14. Height of chimney above ground level
15. Details of construction of chimney (materials, insulation, single or multi-flue internal diameter of chimney top)

F. Supplementary information

16. Scale site plan of proposal, together with scale site plan of other emission sources on same site with heights of chimneys and approximate distance from chimney(s) for which approval is sought. The site plan must clearly show the relationship between the proposed and other development. The site plan must also show the surrounding topographical features and the relationship between the proposal and those features. (Use space overleaf, or attach separate sheet)
17. Any other information relevant to the application
